Trip To Fredericton Part Of 'Extended Honeymoon'

For Linda and Richie Pollock, life as musicians holds a world of advantages and, this trip to Fredericton is part of their "extended honeymoon."

The duo, introduced to Frederictonians during this summer's Busker's Festival, is called 'Love & Magic,' a name they feel appropriately describes their feeling for one another and the love they have for the profession.

Spare Moment

With barely a spare moment in their busy schedule to enjoy their new home in Montreal, the couple shares a vast number of interests, one of which is travelling.

"We met 17 years ago when we were both travelling around Europe," explains Mrs. Pollock. "I knew instantly he was the kind of man I wanted to marry."

The story of their courtship and eventual marriage has the overtones of a fairytale and, unlike those who lose the wedding bliss after the first few years, Mr. and Mrs. Pollock can't seem to keep their eyes off one another. They reflect the strong love and emotion they describe in their songs.

Extension Of Ourselves

"Our music is an extension of ourselves. It expresses joy, love, humanity, happiness and the celebration of life," described Mrs. Pollock.

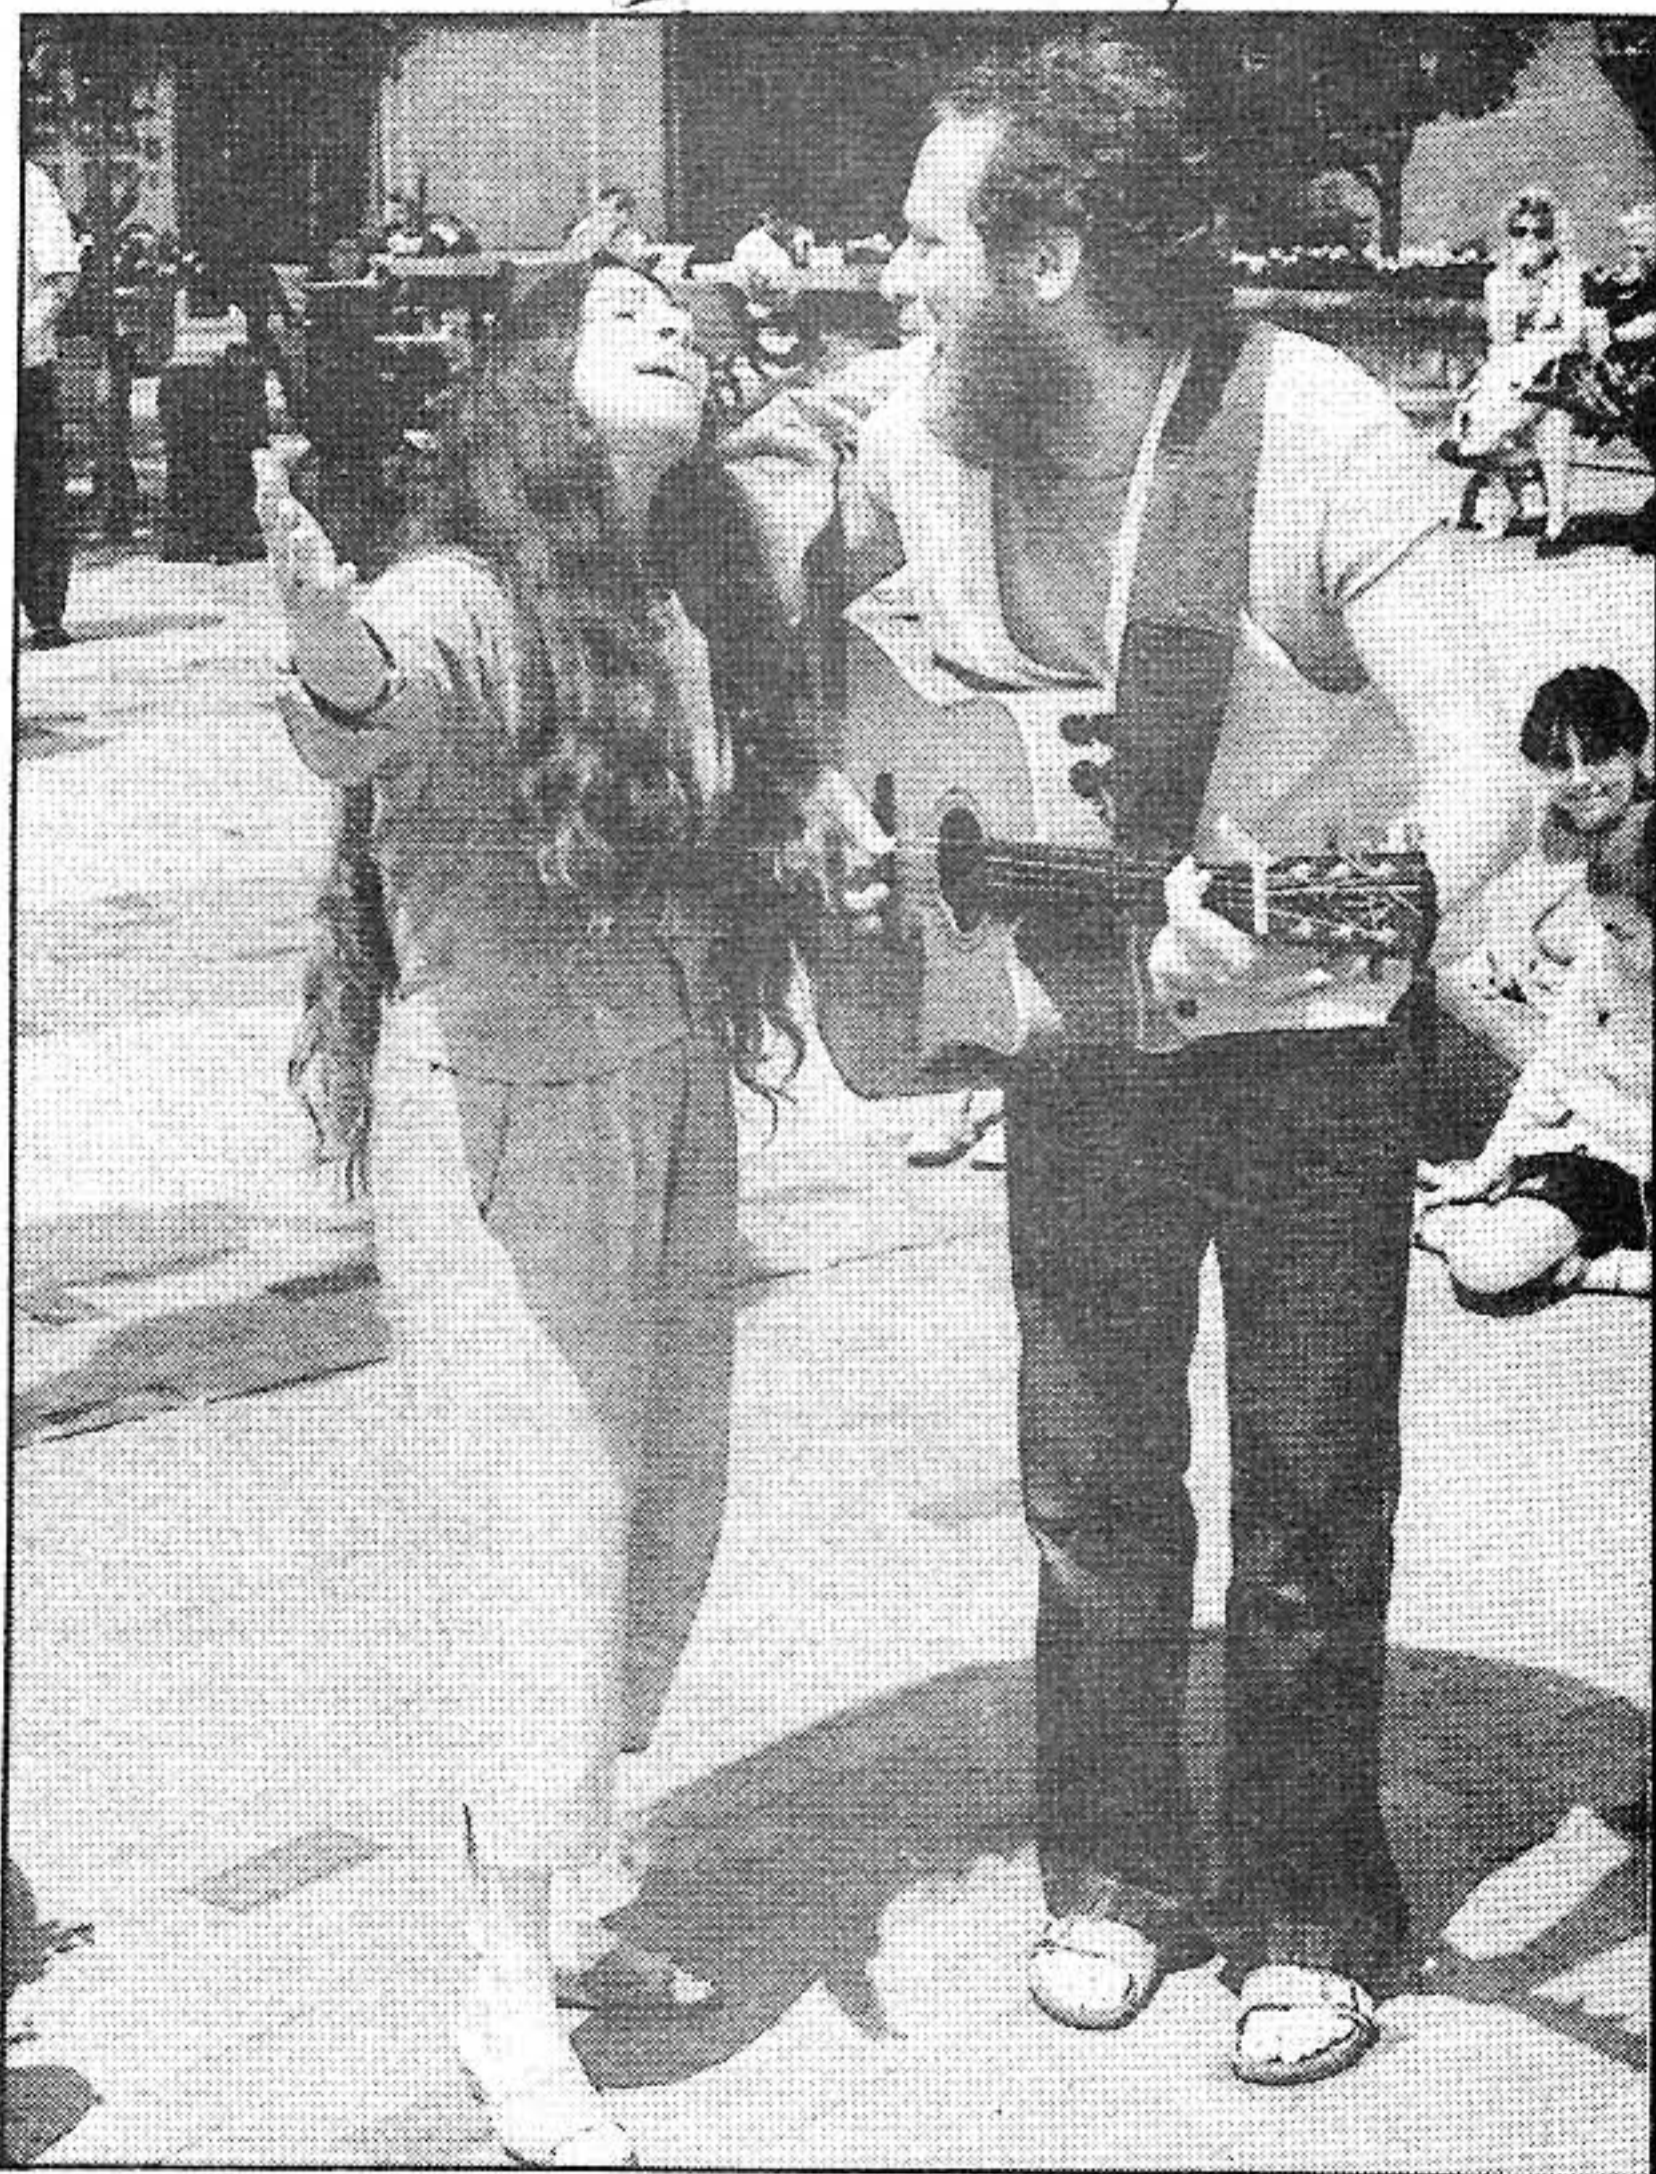

In the beginning, however, music was not something they shared entirely. It wasn't until a few years into the marriage that they discovered they could perform together.

"We were on our way back to Copenhagen, (Denmark) to relive the first time we met when, one night in a club, we were asked to sing." Response to the duo was tremendous, explained Mr. Pol-

with contributions," he said. "That's where the idea to perform for a livelihood occurred to us."

From then on, the rest is history and the couple has been perform-

ing in a wide variety of venues. From seniors homes and underground subway terminals to schools and clubs, the Pollocks (See Trip Page 16)

I'VE GOT YOU BABE — Love & Magic's Linda and Richie Pollock perform hits from the late 1960's early 1970's. The couple, on 'an extended honeymoon' in Fredericton, will be performing
